

Exploration Science Summer Internship

October 26, 2020 -- Anonymous (not verified) **Department:**

City: HOUSTON

State/Province: TX

Category: Moon

Asteroids/Phobos/Deimos

Country: USA

Contact Person: Delia Enriquez

Institution: Lunar and Planetary Institute

Application Due Date: Friday, January 15, 2021

Web Link: https://www.lpi.usra.edu/exploration_intern/ [1]

This summer, students will be involved in activities that support missions to the Moon that utilize the Orion crew vehicle, the Deep Space Gateway, a crew lander, and robotic assets on the lunar surface. It is a unique opportunity to integrate scientific input with exploration activities in a way that mission architects and spacecraft engineers can use. Activities may involve assessments of landing sites and traverse plans for multiple destinations that are responsive to NASA objectives.

The Exploration Science Summer Intern Program builds on the success of the [Lunar Exploration Summer Intern Program](#) [2] that was designed to evaluate possible landing sites on the Moon for robotic and human exploration missions.

Position Type: Other
