

TRICK OR TREAT AND TELESCOPES

Art from Clipart Panda

Put out your telescopes on Halloween!

The Division of Planetary Sciences (DPS) of the American Astronomical Society is encouraging all its members to stage a telescope viewing on Halloween Eve, during Trick-or-Treat time. One of our members (Richard Schmude Jr., of Georgia) has been having a show for years and has reached over 5000 people.

Put your equipment in your own lawn or a neighbor's lawn with better viewing.

Good views for 2018 include a setting Venus and Jupiter.

Please send comments and pictures of your events to bonnie.buratti@jpl.nasa.gov
