# Definitions

## EDI?

- Improving **EQUITY** promotes justice, impartiality and fairness within the procedures, processes and distribution of resources by institutions and systems. Tackling equity issues requires an understanding of the underlying or root causes of outcome disparities within our society.
- DIVERSITY** refers to a broad representation of a community's demographic mix, taking into account elements of human difference focusing on racial and ethnic groups, sexual orientation, gender, gender identity, disabilities, religion, age and perspectives arising from different backgrounds.
- INCLUSION** refers to the degree in which diverse individuals are able to participate fully in the decision- making processes within an organization or group. While a truly "inclusive" group is necessarily diverse, a "diverse" group may or may not be "inclusive."

## But I thought the E was Equality, not Equity?

\*Definitions from: [https://www.oregoncf.org/Templates/media/files/edi/edi\\_booklet\\_2017.pdf](https://www.oregoncf.org/Templates/media/files/edi/edi_booklet_2017.pdf)

# Definitions

**Unconscious (Implicit) Bias**: the attitudes or stereotypes that affect our understanding, actions, & decisions in an unconscious manner.

This occurs regardless of the dominant group:

- Gender: Both men and woman downplay women's contributions
- Race: Both whites and minorities downplay minorities' contributions

**Microaggressions**: subtle, indirect, or unintentional acts of discrimination

**Conscious (Explicit) Bias**: an intentional prejudice in favor of or against one thing, person, or group compared with another usually in a way that's considered to be unfair.

- **Sexism**: a conscious bias: prejudice, stereotyping, or discrimination on the basis of sex.
- **Racism**: a conscious bias: prejudice, stereotyping, or discrimination on the basis of race.

**Harassment**: unwelcome conduct that is based on race, color, religion, sex, national origin, age, disability or genetic information.

## What do Biases and Harassment look like in STEM:

- STEM fields are shown to have implicit bias that is impactful (both gender & race based):
  - Opportunities in mentorship [Milkman et al. 2015]
  - Opportunities in the classroom [Eddy et al. 2014; 2015; Grunspan et al. 2016]
  - Workplace conflict & stereotype issues [Williams et al. 2014; 2016; Rios & Stewart, 2015]
- WOC Science faculty have decreased, even as white women faculty have increased [Armstrong & Javanovic, 2015]
- WOC are more likely to be junior in rank [NSF, 2015]
- In physics, women (and WOC specifically) are isolated & experience microaggressions in workplace [Barthelemy et al., 2015a; 2015b]
- White women and POC are underrepresented in physical sciences to a far greater degree than the biological or social sciences [NSF, 2015]
- Women and POC experience more workplace incivilities [Cortina et al., 2013; Kabat-Farr & Cortina, 2012]

# Demographics in Planetary Science

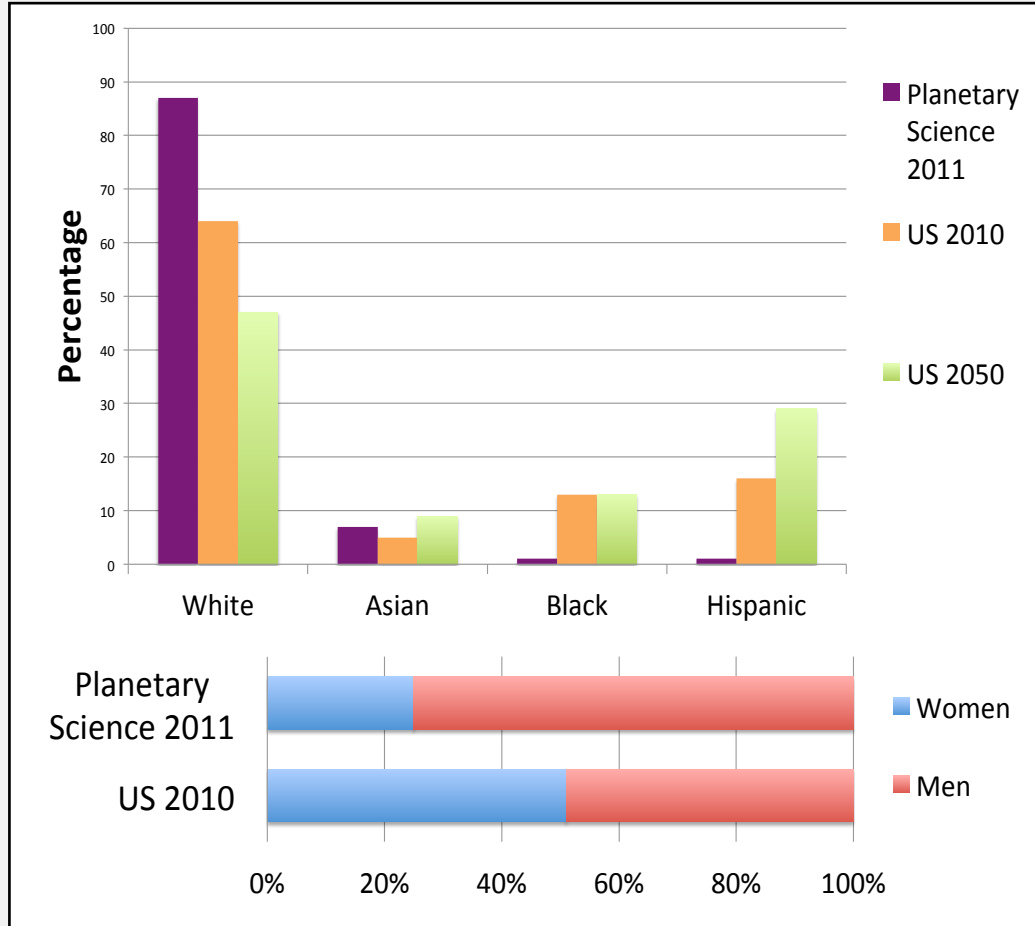

Figure by Rathbun et al. (2017), with input from the 2011 Planetary Science Workforce Survey (White et al. 2011), the 2010 US Census, and the US Population predictions (Passels and Cohn, 2008).

# Women on Science Mission Teams (PSD)

Of 301 PI-led mission proposals from 2001-2017, only 30 had female PIs and 87% of those came through PSD solicitation

-Michael New's Diversity & Inclusion presentation to the Astrophysics Advisory Committee on April 12<sup>th</sup>, 2018

Figure by  
Rathbun et al.  
(2017).

# Gender Demographics in Academia

**Table 12. Female Professors by Rank and Year at Top 50 Departments**

Discipline	FY2002*				FY2007			
	Assistant	Associate	Full	All Ranks	Assistant	Associate	Full	All Ranks
Chemistry	21.5%	20.5%	7.6%	12.1%	21.7%	21.3%	9.7%	13.7%

# Survey Construction and Recruitment

## **lgbt+physicists**

Adapted survey  
questions regarding  
workplace climate

39 questions  
Administered via  
Survey Monkey  
website  
January – March  
2015

### Recruitment

Women in Astronomy Blog  
Featured at 225<sup>th</sup> AAS Meeting  
AAS Division of Planetary Sciences  
The Planetary Exploration Newsletter  
The AAS Women Newsletter  
Multiple Facebook groups (in community)  
Several academic departments

Over 400  
astronomers  
and  
planetary  
scientists  
responded

Regarding current  
position

# Results

## Negative Language Heard

**88%** heard from peers  
**51.9%** heard from supervisors  
**88%** from others

## Responses to Harassment

**39%** report verbal harassment  
**9%** report physical harassment

## Safety

**27%** have felt unsafe

**11%** have skipped at least one  
professional event because felt unsafe

Statistically  
significant  
associations

hearing negative comments  
from peers and supervisors

experiencing verbal and  
physical harassment

feeling  
unsafe

# Career Consequences to Climate

Women of Color face harassment in intersectional ways:

- 40% of women of color & 27% of white women in sample have felt unsafe due to gender.
- 28% of women of color have felt unsafe due to race

Loss of professional opportunities for women generally and men and women of color

- Negative climate keeps numbers low especially for women of color
  - increases the risk of stereotype threat [Steele, 1997; Steele and Aronson, 1998]
  - underestimation of performance [Keller and Dauenheimer, 2003; Nielsen, 2015; Shapiro and Williams, 2012]
  - lack of critical mass in job searches [Valian, 1998]

# NASEM Report on Sexual Harassment (2018):

<http://sites.nationalacademies.org/shstudy/index.htm>

## Findings:

- ~50% of women faculty and staff in academia experience sexual harassment.
- Between 20-50% of students in science, engineering, and medicine experience sexual harassment from faculty or staff.
- The cumulative effect of sexual harassment is significant damage to research integrity and a costly loss of talent in academic sciences, engineering, and medicine.
- The 2 characteristics most associated with higher rates of sexual harassment are (a) male-dominated gender ratios and leadership and (b) an organizational climate that communicates tolerance of sexual harassment
- **Organizational climate is, by far, the greatest predictor of the occurrence of sexual harassment, and ameliorating it can prevent people from sexually harassing others.**

# LGBT Climate in Physics

BUILDING AN INCLUSIVE COMMUNITY

## APS Report LGBT Climate in Physics (2016):

<https://www.aps.org/programs/lgbt/upload/LGBTClimateInPhysicsReport.pdf>

### Findings:

- LGBT physicists have faced uneven protection & support from legislation and policies.
- The overall climate experienced by LGBT physicists was highly variable.
- In many physics environments, social norms established expectations of closeted behavior.
- Isolation was a common theme for many LGBT physicists.
- A significant fraction of LGBT physicists have experienced or observed exclusionary behavior.
- **LGBT physicists with additional marginalized identities faced greater level of discrimination.**
- **Transgender and gender-nonconforming physicists encountered the most hostile environments.**
- Many LGBT physicists were at risk for leaving their workplace or school.
- LGBT physicists reported trouble identifying allies to help mitigate isolation, exclusion, or marginalization.

# Workplace Climate Surveys

- Collecting proper data from workplace climate surveys and using that data to analyze your workplace environment is one way to understand issues with **Inclusion** and **Equity**.
- Key Next STEP: Create recommendations, followed by policies, that actually impact **EDI** for the better.

## CSWA Survey on Workplace Climate: Solutions

1. Education on appropriate workplace behavior required for all employees [Clancy et al., 2014; Cortina et al., 2013]
2. Diversity and cultural awareness training necessary to raise awareness and understanding of the problems faced by women of color and other underrepresented groups [Norman et al., 2013]
3. Leaders need to model inclusive behavior and define inclusive culture [Clancy et al., 2014; Cortina et al., 2013 Settles et al., 2006]
4. When abuses are reported, “instigators should be swiftly, justly, and consistently sanctioned” [Cortina et al., 2013, p. 1600]

Initiatives to increase numbers of women of color [Norman et al., 2013]

- Build cohorts of women of color to enable creation of peer networks
- Encourage fair hiring practices to minimize implicit bias
- Incentivize departments who support women of color

# Preventing

## Sexual Harassment in Academia

Together we can do better by creating a climate that discourages all forms of sexual harassment. Here is what we need to do:

### 1. Integrate values into the system.

Policies and procedures must embody the institutional values of diversity, inclusion, and respect.

### 2. Change the power dynamics.

Institutions need to diffuse advisor-trainee relationship dependencies by:

- encouraging advisor networks
- providing independent funding

### 3. Support targets of sexual harassment.

Institutions must do more by providing alternative ways to:

- access support services
- record information about an incident
- report an incident without fear of retaliation

### 4. Improve transparency & accountability.

Institutions need to make their communities aware of the consequences sexual harassers will face and demonstrate that the institution is investigating and holding people accountable.

Learn more about these recommendations and the evidence behind them.

#ScienceToo

[www.nationalacademies.org/SexualHarassment](http://www.nationalacademies.org/SexualHarassment)

## NASEM Report on Sexual Harassment:

<http://sites.nationalacademies.org/shstudy/index.htm>

### Recommendations:

- Leaders in academic institutions and research and training sites **must pay increased attention to and enact policies** that cover gender harassment as a means of addressing the most common form of sexual harassment and of preventing other types of sexually harassing behavior.
- **Move beyond legal compliance to address culture and climate.** Academic institutions, research and training sites, and federal agencies should move beyond interventions or policies that represent basic legal compliance and that rely solely on formal reports made by targets.
- Professional societies should accelerate their efforts to be viewed as organizations that are helping to create culture changes that reduce or prevent the occurrence of sexual harassment.

### Recommendations for Institutions:

- Create diverse, inclusive, and respectful environments
- Diffuse the hierarchical and dependent relationship between trainees and faculty
- **Provide support for targets**
- **Improve transparency and accountability**
- Strive for strong and diverse leadership
- Make the entire academic community responsible for reducing and preventing sexual harassment

## APS Report LGBT Climate in Physics (2016):

<https://www.aps.org/programs/lgbt/upload/LGBTClimateInPhysicsReport.pdf>

# LGBT Climate in Physics

BUILDING AN INCLUSIVE COMMUNITY

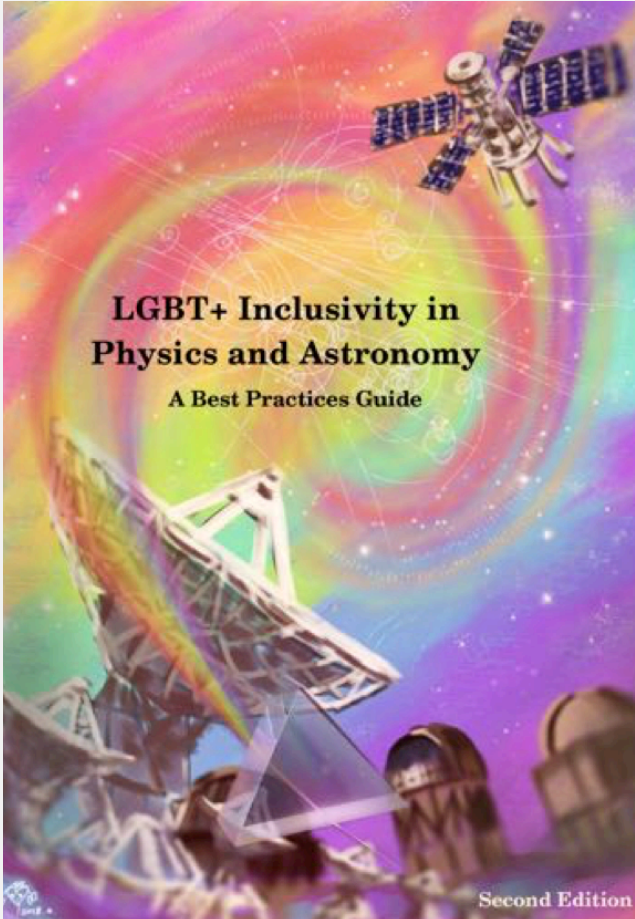

### Recommendations:

- **Ensure a safe and welcoming environment** at meetings.
  - **Establish written best practices**
  - **Implement Code of Conduct**
- Address the need to systematically accommodate name changes in publication records.
- Develop advocacy efforts that support LGBT equity and inclusion
- Promote LGBT-inclusive practices in academia, national labs, and industry.
  - Disseminate Best Practice Guide developed by LGBT+ physicists
  - Develop training program on inclusive workplace and mentorship practices
  - Utilize Climate Site Visit Programs.
- Implement LGBT-inclusive mentoring programs.
  - Includes creating a professional network of LGBT mentors and mentees and hosting networking events.
- Support the establishment of a Forum on Diversity and Inclusion.

# LGBT+ Inclusivity in Physics & Astronomy Best Practices Guide (2<sup>nd</sup> ed, 2018):

[https://sgma.aas.org/sites/sgma.aas.org/files/LGBTInclusivityPhysicsAstronomy-BestPracticesGuide2ndEdn\\_small.pdf](https://sgma.aas.org/sites/sgma.aas.org/files/LGBTInclusivityPhysicsAstronomy-BestPracticesGuide2ndEdn_small.pdf)

## LGBT+ Inclusivity in Physics and Astronomy

A Best Practices Guide

Second Edition

### Recommendations:

- **Assess and address:** participate in or conduct a climate survey, collecting demographic information, carrying out classroom climate assessments. Establish a departmental climate committee and/or liaison and explicit LGBT+ supportive policies.
- **Break the silence and invisibility:** Initiate department-wide discussions of LGBT+ concerns, highlight the scientific contributions of LGBT+ department members at all levels, join an "Out List" as an ally or LGBT+ scientist, identify LGBT+ supportive mentors, invite LGBT+ speakers to campus.
- **Educate and advocate:** Participate in LGBT+ friendly climate and anti-bias training, work for campus-wide LGBT+ supportive practices such as supportive first responders and gender-inclusive restrooms and accompanying signage.
- **Set the example and expectations:** include preferred pronouns in your email signature, invite students and/or meeting participants to share their preferred pronouns, articulate classroom environment expectations on the first day of class, speak up in response to discriminatory behavior and report where appropriate.
- **Support and include:** Plan gender-neutral and inclusive social events, create LGBT+ safe spaces in your department, provide equal restroom access, include LGBT+ faculty in positions of authority, provide support for participation in LGBT+ networking events, ensure LGBT+ needs are considered in dual-career hires, family-friendly policies, and benefits.

# Tips to do better

- **Collect demographic information & use it to build policies**
- Diversify your network & institution
  - Aim for 30% across all levels (proportionality matters!)
  - Make sure your department/institution seminars, committees, panels, etc. have a good diversity balance (race, gender, etc.)
  - Don't reinforce stereotypes when diversifying
- Amplify minority voices in the room during discussions
- Foster and draw on mentorship roles & responsibilities
- Work with experts in the fields in demographic data collecting and social scientists who study workplace climates
- Make sure you're aware of unconscious/implicit bias:  
<https://implicit.harvard.edu/implicit/>
- Discuss how Implicit Bias affects your daily work efforts:
  - Resumes, Job credentials, Fellowships, Hiring, Awards, Promotions, Proposal Reviews

**Remember to account for ALL the components of EDI when building policies:  
Equity, Diversity, and Inclusion!**

# Tips to do better

- Avoid making sexual remarks when in the work environment
  - Also avoid trying to make sexual advancements at folks beneath you in the power dynamic.
- Offer and Take Bystander Intervention Training!
  - <http://stepupprogram.org>
- **LEAN IN TO YOUR DISCOMFORT**
  - Learn about benevolent sexism, mansplaining, & tone arguments & avoid these behaviors
    - It's **NOT** the job of marginalized community members to teach you these things. Instead, try google, twitter, social science literature, talks like this, etc.
  - Know when to listen
  - Don't belittle or dismiss someone
  - **Avoid victim blaming**
- **Don't expect a cookie when you do all of these things**
- For those who have been an ally for a long time, or you are someone who has dealt personally with being harassed or assaulted, it's okay to take breaks. Remember Self Care. Avoid Burnout.  
<http://www.compassionfatigue.org/pages/selftest.html>

# Other EDI presentations this week

- Tuesday
  - Talk: 11:50 AM: 205.07 History of the Planetary Science Workforce: Why does the DPS need a subcommittee on Professional Culture and Climate?
  - Poster: 3:35 PM: 213.05 Introducing the DPS Professional Culture and Climate Subcommittee
